## OBITUARY

Leola Ostrander

The death of Leola, younger daughter of Mr. and Mrs. West, Ostrander, occurred yesterday at Calgary, following an illness of six weeks duration. The body will be shipped to Oyen to-day and the funeral will take place to-morrow. Service will be conducted in Oyen Union Church at 3 p.m., interment to follow at Oyen Cemetery.

Oyen Boy Heads His Class in Calgary

Joseph Cooper, who is now residing in Calgary with his mother, has won the distinction of being head of his class (Grade 8) with 90.1-7 per cent marks. This success in a class of 43 pupils must be most gratifying to the boy, and will be viewed with satisfaction by his teacher and parents.

## Letter to Editor

To Editor, Oyen News:  
Dear Sir:

Would you please publish a few lines to the man who will be in Oyen on October 11, to tell you anything you want to know. There is one thing he probably will not tell you and that is God will withdraw from you when you appeal to Satan for knowledge. Only for Women's rights I would say as Jesus said, "Choose you this day whom you will serve, but as for me and my house I will serve the Lord".  
Wm. Affleck, Oyen, Alta.

A delegation from Calgary visited the site of the Fuego Oil Co., last week. Drilling is going on satisfactorily. A depth of 1100 feet has been reached, 1084 of which is cased off. At the latter depth 5 feet of limestone rock was encountered.

Threshing in the district, which was brought to a halt by last Wednesday's rain, was resumed yesterday afternoon and is general to-day.

Subscribe to the Saturday Evening Post, Ladies Home Journal, Good Housekeeping or Maclean's at the News Office.

Oyen Chautauqua next Tuesday, Wednesday and Thursday. Good programs. Get your season ticket now.

## The World Series

Giants Again Take Lead

Games Now Stand Giants 3 Senators 2

By winning their game to-day at New York, the Giants broke the 2-2 tie and went into the lead again in world series. A home run by Bently (the second Giant pitcher to make one in this series) with Gaudy ahead of him, put the Giants in favorable position in the fifth inning, and a reply of 3 runs in the 8th to the Senators' lone run in their half, put the game on ice.

The score, fifth game:  
Giants.....001 020 03X—6  
Senators.....000 100 010—2

## Previous Games

At Washington, Saturday.  
Giants.....010 100 000 002—4  
Senators.....000 001 001 001—3

At Washington, Sunday.  
Giants.....000 000 102—3  
Senators.....200 010 001—4

At New York, Monday.  
Senators.....000 200 011—4  
Giants.....021 101 01X—6

At New York, Tuesday.  
Senators.....003 020 02X—7  
Giants.....100 001 011—4

The sixth game of the series will be played at Washington to-morrow.

## Farmers' Union Organize Here

McNeely of Saskatchewan  
Favorably Impressed His Audience

A meeting in the interests of the Farmers' Union of Canada, was held in Oyen last Friday evening. President McNeely gave an exceptionally good talk for 2 hours and favorably impressed his audience. At the conclusion of the meeting a lodge was formed.

## In Lighter Vein

Dad (sternly): "Where were you last night?"

Son: "Oh, just riding around with some of the boys."

Dad: Well, tell 'em not to leave their hairpins in the car."

\*\*\*

Do you think you could care for a fellow like me?  
Oh, yes, I think so—if he wasn't too much like you.

The new wing of the Chateau Lake Louise, the Canadian Pacific Railway's hotel at Lake Louise, one of the choicest beauty spots in the Rockies, is now under construction to replace that portion destroyed by fire some months ago. It will be a nine-story, fire-proof, steel-frame structure of stucco, brick and stone, richly furnished in the best style of a mountain hotel, and will contain 280 bedrooms, bringing the total in the hotel up to 390.

The hunt for fur is extending northward each year, according to officials of the Hudson's Bay Company and Revillon Freres. They have already despatched their steamers on their annual tour of the northern posts which are now being located farther and farther north as the field of the pelts hunters is extended into the Arctic. The Hudson's Bay Company now has a numerous chain of posts in Baffinland and other areas north of Hudson Strait.

## Bring Down Production Costs

The rise in the price of wheat means a better return for his year's work to the Western farmer, and this betterment does not come a bit more, because it is admitted by everybody that things have not been well with Western agriculture.

Too frequently in the past an increase in the selling price of wheat has been accompanied by an increase in the cost of production and marketing, with the result that the benefits of the higher prices has not accrued to the farmer. This year, however, this situation does not, fortunately, prevail. On the contrary, production and marketing costs are, on the whole, lower.

Gratifying and important as is the rise in the price of wheat, reductions in production and marketing costs are even more important. The advance in price may be but temporary, and a change in world crop conditions next year may mean a decided drop. Reductions effected in production and marketing costs are likely to continue effective for a longer period of time, and, inasmuch as a penny saved is as good as a penny earned, the importance of bringing about such reductions in a permanent way becomes manifest.

The inauguration of Wheat Pools in the three prairie provinces with a joint selling agency is destined to bring about a permanent saving in costs of marketing and selling, while at the same time assisting to maintain prices by preventing the dumping of too great a volume of wheat on the market at any one time, thereby "breaking the price." If the farmers stand loyally by their Pools—and we believe the vast majority will—coupled with careful and expert management, the desired results should be realized.

A lasting reduction in production costs should likewise result from the coming into full effect of the lower freight rates provided for in the Crow's Nest Pass Agreement. True, as those rates have been applied, discrimination of various kinds has resulted, which discriminations cannot be allowed to continue, and the matter now before the Railway Commission for adjudication.

However, as the Crow's Nest Pass rates are part and parcel of a contract, and as the Dominion Government has fulfilled its part of that contract, the people have a right to expect, and will demand, that the lower rates provided for, and the consideration for which the country has already paid, be maintained, and any discrimination existing removed, not by raising these rates, but by meeting them where necessary.

Railway freight and express rates are still higher in the West than in the East, notwithstanding the fact that the old baggage that operating costs were greater and net earnings lower in the West than in the East has long since been disposed of, and the fact established that the reverse is true. Freight rates are still unduly burdensome on Western production and development, both as to incoming and outgoing shipments. It is probable that the railways are not wholly to blame for present rates. They are still suffering from the Insane McAdoo award in the United States during the war which boosted wages of railway employees out of all proportion to those prevailing in other lines of business activity, and imposing restrictions on employment even more serious than the wage increases. The producers of Canada cannot continue to pay these wages and employ more men than are necessary to give required transportation service.

Farmers themselves can continue to do much individually to bring down their production costs. To an increasing extent they can themselves raise supplies which to too great an extent in the past they purchased at the prevailing high prices. Greater care of farm machinery and its proper housing when not in use, will reduce repair bills enormously and lengthen the life of necessary farm equipment.

Then, too, the most expensive business in which many Western farmers are today engaged is the production of weeds and the threshing, hauling to market, freight to terminals, and finally cleaning of weed seeds. Not only does all this constitute a dead loss in itself, but through lower yields per acre and in depreciation of land values it must prove a serious financial burden. No matter how high the price of wheat may get, it will not compensate for this loss, and regardless of how low freight rates may be, they will always be extraordinarily heavy on non-productive weed seeds, of which, unfortunately, thousands of tons are raised annually.

Western farmers act wisely in co-operating in the marketing and selling of their grain; they do well to continue the fight for lower freight rates and reductions in the cost of raising their grain; they must persevere, and their efforts there must be unrelenting attention to individual farm management if Western agriculture is to prosper and be lifted out of its present depression.

### Lead World Grain Storage Facilities

With the operation of the Ballentine elevator, the latest addition to the numerous grain elevator plants along the south shore of Port Arthur, it is claimed the Canadian "Head of the Lake" port lead the world with grain storage facilities. Within the new plant, which will commence operation on October 1, Port Arthur takes the lead over Port Vancouver in aggregate capacity, although the latter has more plants.

### Flying Comes High

Has Already Cost the Nations Billions of Dollars

Our great dirigible ship, the Shenandoah, cannot have a hangar on this coast because it would cost too much—about \$2,500,000. A mooring mast is all the nation can afford, and even that will cost \$100,000. This of that—\$100,000 for a hitching post! It is said that by the time the system encircle the globe complete their journey will cost something in the neighborhood of \$5,000,000. Of the billions they have already cost the nations there is no yet no complete account, and we doubt if there ever will be. Flying comes, as well it goes, high, and we did not need it. If it had never been invented we would be getting along about as late and could use the money for something else. However, it seems too well to do anything about it now—San Francisco Bulletin.

### THE GROWING GIRL

Requires a Mother's Constant Care

In their early teens it is quite common for girls to outgrow their strength, and this is due to the fact that they are not properly nourished. It is a common mistake to suppose that a girl's growth is complete by the time she reaches her teens. In fact, the growth of the body is not complete until she is twenty years of age. During this period, the body is in a state of constant growth, and it is essential that the girl should be properly nourished. The most important thing for a mother to do is to see that her daughter gets enough food, and that the food is of the right kind. The food should be rich in protein, and should contain plenty of vitamins. The girl should also get plenty of exercise, and should be kept as healthy as possible. If a mother can do these things, her daughter will grow up strong and healthy.

### Saskatchewan

Co-operative Creameries

General Re-organization of the Creameries Has Been Completed

With the appointment of Mr. Percy E. Reed, late Provincial Dairy Commissioner, to the position of Production Superintendent for the Saskatchewan Co-operative Creameries, Ltd., the general re-organization of the creameries has been completed, and it is now possible for the people of Saskatchewan to look upon the organization with any degree of confidence. The new directors, and particularly the new president, Mr. J. A. Grogan, of North Battleford, have devoted themselves unremittingly to the task of re-organization, and the results so far constitute a very gratifying record. The creameries will shortly assume the place in the economic life of Saskatchewan to which they are entitled.

The new general manager, Mr. P. J. McLean, has already succeeded in securing economy and increased efficiency in the creameries, and it is now possible for the people of Saskatchewan to look upon the organization with any degree of confidence.

The new directors, and particularly the new president, Mr. J. A. Grogan, of North Battleford, have devoted themselves unremittingly to the task of re-organization, and the results so far constitute a very gratifying record.

### Notable Utterance

Of Premier Dunning

Outstanding Contribution at Conference of British Nations Held at Winnipeg

The co-operative movement of British nations held at Winnipeg this morning was unique in all this present regard. It was the first conference attended only by English-speaking nations, which have been responsible for the subordination of industry to commerce for two generations; and the conference considered how best to apply a similar degree of industry to commerce and conservation and conservation of the countries hitherto dominated by industrial men.

Previous announcements had indicated that Premier Dunning, of Saskatchewan, had been invited specially by Sir Horace Plunkett to address the conference.

The implications of the conference touched rural civilizations everywhere, says the Irish Statesman, a weekly review of much authority, and long devoted to the marvellous advancement made in rural co-operation in Ireland. "Of these implications," says the Irish review, "perhaps the most significant was the realization of the fact that the co-operative movement is not a doctrine to be argued from an intuition to be acted upon, lay behind all the most notable utterances of the conference, of which the most outstanding were those contributed by Mr. Dunning, the Prime Minister of Saskatchewan, who declared that the farmer's needs definitely Mr. Dunning's mind dominated those sessions of the conference at which he delivered his practical, incisive and magnetic addresses. When Mr. Dunning said that the farmer is the backbone of the nation, and that the farmer is the one who creates when he buys a suit, 'What is the price?' and when he sells exactly the same question, the people contributed to the fact that the statement of the farmer's problem was presented. When later, he said, 'In order to get cheap food for the consumer you must have a co-operative, hard and contented farming population,' the conference realized that the farmer had not solved the problem he posed, he was turning towards the direction in which alone the solution can be found. When it is added that his own earlier training as a co-operator has enabled him, as the head of the government, to realize what the state can and what cannot do helpfully through co-operation to advance the interests of a population, like our own, 70 per cent agricultural, the value of Mr. Dunning's simple contribution to the discussions will be realized."

The Irish review continues: "It was naturally pleasant to Irish representatives to see a policy to be adopted by a committee of the policy of state aid for 'help—the doctrine that the state should be a patron for the co-operative movement, yet may helpfully foster the farmer's own combinations—urged by Mr. Dunning, and the same diverse combinations, supported by the British Minister of Agriculture (Mr. Noel Hood), by Mr. Frank B. Acheson, and by many overseas representatives."

The Irish Statesman tells how a South African delegate, G. W. Klerck, in his speech at Southern Alberta, has produced more than 40,000 pounds of wool. Mr. Klerck stated an apathy in the Calfair irrigated district and has extended his operations to its staples with a total of 200 bee colonies. Mr. Klerck claims that Southern Alberta is one of the finest bee districts in the world.

Minard's Liniment for Dandruff

Alberta Creamery Butter

Nearly twenty-five per cent. increase is expected to be recorded this year in the production of Alberta creamery butter over the production of 1922. The production last season was 17,760,000 pounds and this year is expected to be 22,600,000 pounds.

The number of German emigrants to Canada last year was 1,556, of whom 734 were agriculturists. The total for the first two months of this year was 1,200, of whom 249 expected to be agriculturists.

A Bit About Habit

Habit means turning over to your subconscious mind things to do which you wish to convert into an established custom.

To go to bed does not take any thought, nor to eat your meals, and these two things are merely habits. We miss them if they are taken away from us.

We can also get into the habit of making money, which means that we have turned over to our subconscious mind the art of acquiring money and have become conscious of the fact that we can get it, or have it.

One good habit is being on time. Labor Leader.

The Unbeliever

After being informed beyond a doubt that the moon had no influence upon the weather, how the scientists told us that the equinoxes and solstices are merely a myth. These clever scientists are taking a great deal of the interest out of life—Calgary Albertan.

# Watch your Skin!

It's up to you to look your best

Young girls, old girls, plain girls, pretty girls don't we all wish those days before the mirror when, with a sigh, we turn away and say,

"Gosh—I do look plain!"

On those days when our skin looks bad and won't get right—our noses won't powder—our eyes are all we know that women watch their skin and at the first sign of something take the best remedy—a dose of

# Beecham's Pills

They purify the blood, clear the skin, make you happy, bright and attractive. Sold Everywhere in Canada.

### Eskimos Clever Carvers

King Island Natives Sell Work in Nome During Summer

Every year since Nome can remember the entire native village of King Island makes a pilgrimage to the southern coast of Alaska, arriving about July 4 and remaining most of the summer.

These Eskimos, a clean, industrious and healthy lot, make the trip of approximately 100 miles in boats which they build from the hides of walrus. Seven of these boats carry the whole population, including all their possessions.

The King Islanders are clever carvers. Arriving in Nome with several tons of ivory, they carve the rough tusks into crib boards, gavel, forks, knives, spoons, umbrellas handle, and numerous other things.

The Eskimos are also good merchants and people of Nome patronize them liberally, so that the camp usually collects thousands of dollars during the season, and these profits they put back into circulation by purchasing supplies for the next winter.

These Eskimos are also good athletes compete at Nome and often develop athletes of ability. At other times they provide entertainments with their orchestra.

The Man With Asthma almost longs for death to end his suffering. He sees ahead only years of endless travail with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. R. Kellogg's Asthma Remedy and know what complete relief he can give. He will find his asthma a thing of the past.

Lake Saskatchewan 55 natives of the Beaver nation received the bounty, 250 Crest being paid at Sturges, Sask., following which there was the usual celebration with crisp new one-dollar bills being promptly changed into unusual edibles for the children and haunting ribbons and shawls for the women, with the men folk lubricating in unlimited tobacco.

Do not allow worms to sap the vitality of your children. If attended to, worms may make irreparable harm to the system of the infant. The little sufferers cannot voice their silent, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders are easily and will expel worms from the system without any inconvenience to the child.

Business Better In West

Stimulation if General Trade is Confidently Predicted

Press dispatches state that business conditions generally are reported improved throughout Western Canada. The heavy movement of grain at advanced prices, demand for livestock and other farm products, have brought out more optimism on the prairie than for some time.

The peak of the grain movement has not yet been reached and by the time it is, it is thought retail business will show away from normal. Clothing, boots and shoes, household furniture and lumber are among the articles jobbers and retail merchants report active at present with a tendency to advance.

Although Japan is not a "wet" country, there are in the islands no less than 236 different associations working for temperance, with an aggregate membership of 117,822.

A financier is often merely a man who has the money of other men to pile up a fortune for him.

Nature's complete Food is the most tempting form.

Dr. J. C. Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitation, look for the signature of Dr. J. C. Fletcher on every direction on each package. Physicians everywhere recommend it.

Minard's Liniment for Aches and Pains

Pure Seed Grain

To such an extent has the production of pure seed grain for special purposes in Alberta been stimulated by the success of the past two years of exhibitors at the Chicago International and by the operation of the Alberta Government's cleaning and marketing plant that the plant expects to handle more than 75,000 bushels during the coming season. This will in the main be made up of Marquis and Ruby wheat and Banner and Victory oats.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

The yearly rise crop of the world is about 190,000,000 pounds.

## About Town and Country

**B**orn—To Mr. and Mrs. J. J. Gainer of Excel, on Thursday, October 2, at Oyen Hospital, a son.

**B**orn—To Mr. and Mrs. A. Casselle of Oyen, on October 5, a son.

I am in receipt of a supply of Wheat Pool contract forms for use of those wishing to join the organization.—F. C. Bliss.

The Union Church Sunday School will hold a tea and sale of home cooking on Saturday, October 11, at the Reliance Hardware. Proceeds to purchase new books for Sunday School library.

Mrs. H. J. Cooper, formerly of Oyen and now of Calgary, extends a cordial invitation to the ladies of Oyen to visit her at 105 City Hall Corner, whenever they may be in the city.

A real snap—Good quarter section for sale near Nalcan, Sask. Owner must sell. For full particulars re price and terms etc, write P. H. Peterson, Wakaw, Sask.

Mrs. J. J. Skinner left last Thursday for Calgary to spend the winter months.

Friends and schoolmates of Donald Fleming (Grade XI) will be interested to hear that he has passed the supplemental examination in History, making 10 per cent. Donald is now taking Grade XII at Central High School, Calgary.

Dr. T. F. Holt who has been spending a vacation in Saskatchewan, returned to Oyen last Thursday.

The new telephone directories are in, and town subscribers may obtain same by calling at the Telephone Exchange.

Wanted—One copy of Western Farmers Advocate, issue of July 10, 1923. First in receives 25 cents at the News office.

For Typewriter ribbons, carbon paper and official envelopes, call at the office of the Oyen News.

Mr. James Murray, District Agriculturist, was an Oyen visitor last Friday and showed the News some exceptionally fine samples of seed corn, grown by J. J. Muza of Empress. A sample of Quebec No. 28, measured 8½ inches in length, 6½ inches in circumference at the base, with 12 rows of seed, nicely filled and ripened from base to tip. A sample of North Western Dent lacked ½ inch length of the Quebec, but had ½ inch greater circumference. The samples were taken from an 8 acre field.

The attention of subscribers to the Oyen News is directed to the label on the front page. If your subscription is in arrears we shall be glad to receive your renewal.

### NOTICE

Warning is hereby given that able-bodied men and non-residents will not be granted relief during the coming winter, Dated at Cereal, Alta, this 2nd day of October, 1924.

## Here and There

The Earl of Leitrim, Irish peer, who has been touring Canada, was much struck with the resemblance between north-west Ireland and the maritime provinces, with their wooded hills, sandy beaches and plenty of fish and game, as playgrounds for the tourist.

What is believed to be the largest salmon ever caught by hook and line in waters adjacent to Vancouver, B.C., was landed at Horseshoe Bay, Howe Sound, recently by A. C. Cohen. The fish measured four feet, one inch in length and weighed 64 pounds. It took 35 minutes to land it.

Irwin S. Cobb, the famous American humorist, has been hunting in the St. Maurice valley, served by Canadian Pacific lines. This is by no means his first trip to Canadian hunting and fishing centres, as he is a keen sportsman and has visited the wilds in Ontario, Quebec, Nova Scotia and New Brunswick.

Among the passengers landing at Quebec from the Canadian Pacific liner "Empress of Scotland," recently was Miss Margaret Bondfield, M.P., a member of the Cabinet of the MacDonald Government of Great Britain. Miss Bondfield is in Canada to study conditions in the United States and to assist female immigrants.

Some interesting facts were made public by E. J. Delisle, superintendent of the fish and game department of the Province of Quebec, when in Montreal recently. The province is now teeming with wild life, he says, mainly because of its conservation policy, whereby preserves are rented to fish and game clubs on the understanding that they appoint wardens. There are 500 such clubs employing a total of over 1,000 wardens.

The Trans-Canada Limited, crack transcontinental express of the Canadian Pacific Railway, completed its last run of the season on September 17th, and will not be operated again until next May. The train, which is the fastest long-distance express in North America, covered 755,748 miles in the season, or three times the distance between the earth and the moon, in its 258 runs, and carried the equivalent of 95,000 passengers for varying distances.

U. G. G. Securities Co. Ltd.,  
Canadian Life Assurance Company and other good companies.  
Hudson's Bay Company, Ltd. Dept.  
Notary Public

## LINING THE CONNAUGHT TUNNEL

Upper left—in spite of heavy snowfalls and below snow weather the work on lining the Connaught Tunnel is continued throughout the winter months. The steel-reinforced bricks of Mount Abbott and Ross Park stand as western sentinels of the little town.

Upper right—Glacier, B.C., showing Mount Macdonald, 9,412 feet, through which the first mile of Connaught Tunnel passes. Right—Paula, 1,225, is in the center of the picture and Mount Sir Donald, one of the most beautiful peaks in the Canadian Rockies, lies in the distance. Lower left—The resident engineer's bungalow. The tunnel, showing the first mile, is 14 ft. wide and 14 ft. high, which ventilates the "big hole."

High up on the crest of the lofty Selkirk with half a dozen of the finest mountain peaks in the world hunching their snow-clad shoulders about its rows of iron brown houses, lies the picturesque town of Glacier on the main line of the Canadian Pacific Railway through British Columbia. Three and a half miles distant from this little construction centre, which has virtually been called into being through the lining of the Connaught Tunnel, hangs the great Illecillewaet Glacier on the slopes of Mount Macdonald and two miles nearer nestles Glacier House, the annual mecca of thousands of summer tourists.

Few of the surrounding peaks at Glacier are less than 9,000 feet in altitude. The famous Cheops, Mount Sir Donald, Ross, Eagle and Abbott peaks encircle the little settlement. In winter time a blanket of snow enfolds town and mountains alike. In spring the brilliant yellow alder fills the ever-creasing snow line as it climbs higher and higher up the mountain sides. Life is enlivened in the summer time by the crowds of guests who, through Glacier House and transforms the scene again with generous splashes of orange, crimson and russet.

Common interest in the great engineering project under way has brought about a very definite community spirit at Glacier. The famous Cheops engineer's daddy works in the big tunnel in one or other of the various branches of work which the lining demands, and every household is regulated by a schedule of working hours which begin at 8 a.m. and end at 3 p.m. Half a hundred children attend the little school house and various clubs for the grown-ups provide interests of a recreational and cultural nature.

Engineers, foremen, carpenters, machinists, drillers, electricians, laborers and train crews make up the wage earners among the 600 residents of Glacier. Single men live in a well ordered camp. Here, as the little homes where the men with families live, all the conveniences of a modern city are enjoyed including electric lights and running water piped from a nearby mountain stream.

The lining of this five mile tunnel, the longest on the American continent, with a steel reinforced concrete jacket represents one of the most interesting engineering projects now under way anywhere in the world.

Beneath 6,000 feet of mountain the Connaught Tunnel cuts under Mount Macdonald between the stations of Connaught and Glacier. With the opening of this underground shortcut in 1916 the Canadian Pacific Railway overcame the many difficulties which the old Rogers Pass route had presented. Track curvature to an amount corresponding to seven complete circles was eliminated; the summit attained by the Railway was reduced by 550 feet; the track was shortened by four and a half miles and more than four miles of snow sheds which had been necessary on the slopes of Mount Macdonald were dispensed with.
